

Gas Spring Accessories

Motion Control Oil Dampers

Utilize oil not nitrogen. Adjust the amount of damping by removing the damper from the application, extending the damper, then turning the rod.

NEW

Turning the rod clockwise will increase the damping while turning counterclockwise will decrease the damping. Adjust from almost completely rigid to almost no damping.

Brackets and Connectors

For detailed and controlled force development. Match the thread size of the rod or cylinder end to the thread size of the connecting part that you would like to use on that end.
